WORK HISTORY

Stainless

Sep 2025–Present | Product Engineer | New York, NY

- ✓ Developed design system for Stainless Docs, which powers API reference for Anthropic, Cloudflare, etc.
- ✓ Supported a diverse set of technical customers, triaging issues, and designing and developing features to support customer needs.

The Marriage Pact

Aug 2021–Sep 2025 | Founding Design Engineer | New York

- ✓ Led design engineering at an early stage startup, building several consumer social products.
- ✓ Built the company's first revenue-generating product, scaling revenue from 0 to over \$100k/yr.
- ✓ Designed and built complex front-ends and back-end services to serve hundreds of thousands of users across multiple products.
- ✓ Designed and built complex web visuals with WebGL, CSS, and custom animation systems.

OddCommon

May–Aug 2021 | Developer | Brooklyn, NY

- ✓ Built and launched complex and polished React apps from scratch with great attention to detail.
- ✓ Focused on animation, performance, and micro-interactions to deliver highly polished products.
- ✓ Took creative and technical ownership of client projects.

Johns Hopkins Coronavirus Resource Center

May–Sep 2020 | Full-Stack Software Engineer | Remote

- ✓ Maintained and expanded coronavirus.jhu.edu, a critical, high-traffic public health resource.
- ✓ Created rich visual data displays cited daily by The Washington Post, NPR, and others.
- ✓ Led effort to centralize data processing; created a novel science toolkit underpinning the data pipelines.
- ✓ Oversaw and led development on a full site redesign.

JumboCode

Oct 2019–May 2023 | President | Tufts University

- ✓ Advised and supported over 100 student developers doing pro-bono work to support local nonprofits.
- ✓ Developed and led instructional workshops to teach modern web development.

Moonfarmer

Jun 2018–Sep 2020 | Junior Developer | Kingston, NY

- ✓ Built large-scale React apps in an agile team.

ORIGINAL WORK

Codus.io

2018–2019 | Vue, Express, Docker

Independently designed, developed, and launched a full-featured product—an online educational platform for students to learn programming.

Wikipedia Map

2016 | JavaScript, Node.js, Flask

Original web app allowing users to explore Wikipedia through linked topics. Conceived, designed, and built a custom front-end and back-end from scratch.

AWARDS

BGSTR

Awwwards | 2021 | Honorable Mention, Mobile Excellence

Tau Beta Pi

Academic honor society | 2021–Present

EDUCATION

Tufts University

2019–2023 | B.S. Computer Science | 3.99 GPA

SKILLS

JavaScript

Advanced web development skills; expertise building products with frameworks like Next.js, React, Astro.

React Next.js Astro TypeScript WebGL
