WORK HISTORY

The Marriage Pact

Aug 2021–Present | Lead Design Engineer | New York, NY

- ✓ Design and build complex front-ends for multiple products, collaborating with back-end developers.
- ✓ Lead engineering discussions to develop a robust and scalable architecture for an early-stage startup.
- ✓ Contribute significantly to product design and ideation through active discussion, helping develop multiple viral social products.
- ✓ Rapidly develop and iterate on new products with changing feature sets.

OddCommon

May–Aug 2021 | Developer | Brooklyn, NY

- ✓ Built and launched complex and polished React apps from scratch with great attention to detail.
- ✓ Focused on animation, performance, and micro-interactions to deliver highly polished products.
- ✓ Took creative and technical ownership of client projects.

Johns Hopkins Coronavirus Resource Center

May–Sep 2020 | Full-Stack Software Engineer | Remote

- ✓ Maintained and expanded coronavirus.jhu.edu, a critical, high-traffic public health resource.
- ✓ Created rich visual data displays cited daily by The Washington Post, NPR, and others.
- ✓ Led effort to centralize data processing; created data science toolkit upon which the site's primary engagements are built.
- ✓ Oversaw and led development on a full site redesign.

JumboCode

Oct 2019–May 2023 | President | Tufts University

- ✓ Advise and support over 100 student developers doing pro-bono work to support local nonprofits.
- ✓ Create and lead instructional workshops to teach modern web development.

Moonfarmer

Jun 2018–Sep 2020 | Junior Developer | Kingston, NY

- ✓ Built large-scale React apps in an agile team.
- ✓ Wrote extensive documentation and blog posts.

AppMobi Inc.

Jun–Aug 2016 | Summer Intern | Poughkeepsie, NY

- ✓ Built and deployed mobile apps using Angular.js.

ORIGINAL WORK

Codus.io

2018–2019 | Vue, Express, Docker

Independently designed, developed, and launched a full-featured product—an online educational platform for students to learn programming.

Wikipedia Map

2016 | JavaScript, Node.js, Flask

Original web app allowing users to explore Wikipedia through linked topics. Conceived, designed, and built a custom front-end and back-end from scratch.

AWARDS

BGSTR

Awwwards | 2021 | Honorable Mention, Mobile Excellence

Tau Beta Pi

Academic honor society | 2021–Present

EDUCATION

Tufts University

2019–2023 | B.S. Computer Science | 3.99 GPA
