WORK HISTORY

Stainless

Sep 2025–Present | Product Engineer | New York, NY

- ✓ Developed design system for Stainless Docs, which powers API reference for Anthropic, Cloudflare, etc.
- ✓ Supported a diverse set of technical customers, triaging issues, and designing and developing features to support customer needs.

The Marriage Pact

Aug 2021–Sep 2025 | Founding Design Engineer | New York

- ✓ Led design engineering at an early stage startup, building several consumer social products for a college audience.
- ✓ Built the company's first revenue-generating product, scaling revenue from 0 to over \$100k/yr
- ✓ Designed and built complex front-ends and back-end services to serve hundreds of thousands of users across multiple products.
- ✓ Developed boundary-pushing web visuals with WebGL, CSS, and custom animation systems.

OddCommon

May–Aug 2021 | Developer | Brooklyn, NY

- ✓ Built and launched complex and polished React apps from scratch with great attention to detail.
- ✓ Focused on animation, performance, and micro-interactions to deliver highly polished products.
- ✓ Took creative and technical ownership of client projects.

Johns Hopkins Coronavirus Resource Center

May–Sep 2020 | Full-Stack Software Engineer | Remote

- ✓ Maintained and expanded coronavirus.jhu.edu, a critical, high-traffic public health resource.
- ✓ Created rich visual data displays cited daily by The Washington Post, NPR, and others.
- ✓ Led effort to centralize data processing; created a novel science toolkit underpinning the data pipelines.
- ✓ Oversaw and led development on a full site redesign.

JumboCode

Oct 2019–May 2023 | President | Tufts University

- ✓ Advised and supported over 100 student developers doing pro-bono work to support local nonprofits.
- ✓ Developed and led instructional workshops to teach modern web development.

Moonfarmer

Jun 2018–Sep 2020 | Junior Developer | Kingston, NY

- ✓ Built large-scale React apps in an agile team.
- ✓ Wrote extensive documentation and blog posts.

ORIGINAL WORK

Codus.io

2018–2019 | Vue, Express, Docker

Independently designed, developed, and launched a full-featured product—an online educational platform for students to learn programming.

Wikipedia Map

2016 | JavaScript, Node.js, Flask

Original web app allowing users to explore Wikipedia through linked topics. Conceived, designed, and built a custom front-end and back-end from scratch.

AWARDS

BGSTR

Awwwards | 2021 | Honorable Mention, Mobile Excellence

Tau Beta Pi

Academic honor society | 2021–Present

EDUCATION

Tufts University

2019–2023 | B.S. Computer Science | 3.99 GPA

SKILLS

JavaScript

Advanced web development skills; expertise building products with popular frameworks like React and Vue.

React Next.js TypeScript Node WebGL

Product Design

Driven to design beautiful and accessible user interfaces that make products easy to use.

Figma Sketch CSS layout CSS animation
